

**Description:**

The Slopehelper apple picker is an innovative solution designed to meet the demands of high-density and intensive orchards. Equipped with three manipulators and an advanced distributing system, this hinged equipment delivers the operational efficiency of six manual laborers.

Apple Picker ensures careful handling of fruit while delivering high efficiency and accuracy throughout the harvesting process. This advanced technology boosts productivity and reduces the need for manual labor, setting a new standard for harvesting solutions in modern agriculture.

**Technical data sheet:**

Deck material Aluminum  
Number of hands 3 or 6  
Harvesting speed 5000 pcs/h  
Max height of fruits 3200 mm  
Min height of fruits 650 mm  
Sound power level 60 dB
