System workflow overview

NATURAMON

COMPANY

Naturamon is revolutionizing the agricultural industry with its advanced monitoring system, the Naturamon Fieldmap, which creates digital twins of orchards. This technology provides detailed tree-by-tree data to optimize farming operations, boost yields, and facilitate precision agriculture. By integrating easily with existing camera systems, Naturamon reduces barriers to entry, making sophisticated agritech accessible to all farmers.

PRODUCTS AND SERVICES

Automated apple count; production and harvesting history on tree level; continuous improvements of management practices;
