Commercial Model Name

Product Name : SHIFT ALPHA BOA 130

The uncompromising, all-in-one freeride boot.

Developed to help you master any uphill and conquer every downhill, Salomon's SHIFT ALPHA BOA 130 are true freeride boots with alpine capabilities. The FreeSpine™ connects the cuff and shell for more power and control, while the ExoBelt® and BOA® Fit System deliver micro-adjustable, precision fit engineered to perform in the toughest conditions.

Precision and responsiveness

Following Alpha's fit formula, these boots' 98 last ensures a solid yet inclusive fit designed to maximize control and deliver more responsiveness when skiing on wider skis.

Increased uphill performance

These light boots feature a new TwinLock™ system with a 55-degree range of motion and GripWalk soles for more comfort and secure compatibility with bindings on the market.

Exceptional foothold

The hooked strap, ExoBelt™, and BOA® Fit System work together to keep your boots close, ensuring increased stability, minimal heel movement, and efficient power transfer.

Allenamento principale

- Sci alpino
