Product Name : HAWX ULTRA XTD 130 BOA GW

**The ultimate all-mountain crossover boot, the Atomic Hawx Ultra XTD 130 BOA GW blurs every line between downhill performance and walkable efficiency.**

The ultimate all-mountain crossover boot, the Atomic Hawx Ultra XTD 130 BOA GW blurs the line between downhill performance and walkable efficiency. Next-generation Prolite uses the lightest profile possible and then adds reinforcements to key areas to create a super robust all-mountain / freeride touring boot that is 25% more stable for supremely powerful skiing. The BOA® Fit System Alpine uniformly wraps the shell around the foot to provide a secure foothold for precise skiing performance and an even more comfortable fit. Completely customizable, heat-moldable Memory Fit together with the Mimic Platinum Liner can be uniquely molded to the precise shape of the foot. The Adaptive Fit System (AFS) Tongue allows for various tongue positions for a more precise fit over the instep. The highly adaptive GripWalk Sole makes it compatible with all GripWalk, MN, MNC and Pin bindings, and the cuff offers a generous 54° range of motion for unimpeded movement. A powerful hard-flexing boot that offers a low volume, 98mm fit, this is the dream boot for those who ski every run at the resort yet like to explore fresh snow and more adventurous skiing beyond the boundaries.

**Memory Fit**

Advanced heat-fitting technology creates a fully personalized shell, cuff and liner in minutes.

**Mimic**

Special heat-moldable plastic in heel, ankle, tongue and cuff areas mimic the shape of your foot.

**Adaptive Fit System (AFS) Tongue**

The adjustable AFS Tongue can be repositioned to accommodate different foot shapes and instep heights.
